Exercise 1

“##” and “####” are both headers. “##” symbols are Header with bigger font size and if you add “#” more, the font size gets smaller. Here is the example :

Header

Header

Exercise 2

- *What happens when you surround text with one-star pairs? -> italic*
 - **What happens when you surround text with two-star pairs? -> bold**
 - ***What happens when you surround text with three-star pairs? -> bold and italic***
1. Start typing this list. Note there are two spaces between the period and the word “Start”.
 2. Type the second line of the list
 3. What happens if I type step 3 as another step 1?
 - What does this star at the beginning do? -> Bullet points
 - Visually, it’s similar to the numbered list.
 1. What happens if we nest a list?
 1. Type four spaces, then type the number 3
 2. Did this do what you expected? yes
 2. What if we continue the numbers this way?
 - What happens if we indent using stars? indented bullet points appear.
 - Let’s add another one for good measure.
 - Can we get another level of nesting? yes

What does this do?

Exercise 3

Table 1: The table with poor spacing

Column 1	Column 2	Column 3	Column 4
Notice are	what doing?	the	colons

Table 2: The table with good spacing

Column 1	Column 2	Column 3	Column 4
Notice are	what doing?	the	colons

Exercise 4

Column 1	Column 2	Column 3	Column 4	Column 5
Notice are	what doing?	the	colons	newnew

Exercise 5

```
qplot(x = displ, y = hwy, data = mpg)
```

Exercise 6

```
print(mpg)
```

```
## # A tibble: 234 x 11
##   manufacturer model      displ  year  cyl trans drv   cty   hwy fl   class
